

**CRANE
INSPECTION
SERVICES**

Creating a Safer Industry and Workplace

Advantages

**CRANE
INSPECTION
SERVICES**

- Ensure that cranes are compliant to **Safety Standards** and OEM recommendations.
- Drive a disciplined maintenance regime to make sure the cranes are ready to use when required.
- This is a value add program; carrying out Cranserco's crane inspection will help insure faulty components are identified and allow parts and service to be arranged. This will prevent unscheduled downtime on critical jobs improving safety, customer satisfaction and reducing unscheduled costs.

Safety

**CRANE
INSPECTION
SERVICES**

Mobile crane inspection services is based on CICA's CraneSafe assessment program was developed to augment safety standards with routine inspections to a wide range of mobile cranes.

Inspection service will provide crane owners with:

- Process of 3rd party assessment on safety and system aspects of their cranes.
- Common industry wide system for assessment of their cranes.
- Method by which crane owners fulfill their duty of care obligations towards the safe use and operation of their cranes.

Maintenance

**CRANE
INSPECTION
SERVICES**

Mobile crane routine inspections will provide crane owners with a program to improve overall maintenance procedures on their equipment and ensure the cranes are ready to perform when required.
