

# Stab Pad

Stab pads by Bearing Thermal Resources provide better stability and safety in all lift scenarios.

- Non slip, non-marking TPE layer
- Solid ultra-durable base material
- Custom handle and size options
- Supported by FEA and data analysis

Engineered to improve your footprint on the contact surface

## Why are they unique?

- German press fusion technology bonds the soft non slip surface to the hard durable base composite
- Stack-able CNC machined patterns allow for easy storage, stacking to expand your footprint or meeting OHS weight restrictions
- The only manufacturer of Stabilizer pads to support each design with FEA (finite element analysis) reporting
- Custom sizes and engineered solutions for large lifts available

## AVAILABLE SIZES

Load Rating	7 ton	9 ton	20 ton	20 ton	25 ton	25 ton	30 ton	30 ton	40 ton	40 ton	50 ton
