Re: Robway RCI-4000 Obsolescence.

To whom it may concern:

RCI-4000 systems were manufactured and sold from 1995 to 2008. In 2008 the RCI-4000 Aus/Ex certification scheme ended and Robway was forced to stop manufacturing RCI-4000 systems.

In February of 2019 Robway announced that it will no longer be able to service existing RCI-4000 systems after 31 July 2019 due to component obsolescence issues.

The Robway RCI-4100 system is the successor to the now unavailable RCI-4000 system.

Sincerely,

Jon Koval
General Manager
