OVERVIEW

The FR17 C is a very compact pick and carry mobile crane from Franna product range specially designed for higher lifting capacity applications (17 Tonne). This 4WD crane has a powerful Tier-III emission compliance engine, synchro shuttle transmission and heavy-duty axles that makes it versatile for all types of crane application.

This machine has a large torque converter, there is no clutch pedal which reduces driver fatigue while working for long crane hours. This crane combines safety and comfort with smooth steering flexibility, providing the operator with the ability to lift and manoeuvre in tight spaces. The heavy-duty U section fabricated boom with welding on the neutral axis offers superior durability and a competitive edge while lifting heavy loads.
