VIII. Magna Tyre

NO.	DETAIL PICTURES	DESCRIPTION
1.	 	The Magna MB01 in size 21.00-25 is a premium bias (cross-ply) tire specifically engineered for heavy-duty port and terminal equipment. It is designed to provide high stability and durability under the continuous heavy loading conditions typical of harbor operations **Key Specifications & Applications** • Machine Compatibility: Primarily used for Rubber Tyred Gantry (RTG) Cranes, reach stackers, empty container handlers, and straddle carriers. • Tread Design: Features a non-directional IND-3 tread pattern, which improves traction and performance while allowing for easy mounting on any wheel position. • Construction: All cross-ply (bias) construction with a reinforced carcass and specially treated tire bead for enhanced stability and load-bearing capacity. • Tread Compound: Built with a highly wear-resistant compound that resists cutting, abrasion, and tread cracks to extend the tire's lifecycle. Available stock: 6 pcs **Price : Rp. ~~30.000.000~~** **Rp. 20.000.000** **Location : Balikpapan** **Call : +62 811 592 271** **Email : SALES@CRANSERCO.COM**
